EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony Tridico on August 26, 2009.

The application has been amended as follows:

Cancel claims 49-69, 84-86, and 91-98.

Add new claims 99 and 100, as set forth below. The dependency of claims 70-79, and 88-89 has been changed.

70. The system according to claim [[69]] 99, wherein said at least one reagent comprises at least two reagents arranged in a sequence according to a staining protocol.

71. The system according to claim [[69]] 99, wherein said at least one pre-treatment operation comprises removal of an embedding medium from said at least one tissue sample.

72. The system according to claim [[69]] 99, wherein said at least one pre-treatment operation comprises target retrieval.

73. The system according to claim [[69]] 99, wherein said at least one pre-treatment operation comprises both target retrieval and removal of an embedding medium from said at least one tissue sample.

74. The system according to claim [[69]] 99, further comprising: a drawer assembly adapted to retract from said system, wherein said drawer assembly comprises the slide rack.

78. The system according to claim [[69]] 99, wherein said fluid containment element comprises a heating member.

79. The system according to claim [[69]] 99, further comprising:
a pneumatic element adapted to transfer liquid from a supply tank to a transfer tank and from said transfer tank to said fluid containment element; and
a drain element adapted to remove liquid from said fluid containment element to said transfer tank and from said transfer tank to a waste collection tank.

88. The automatic stainer system according to claim [[86]] 100, wherein the fluid containment element comprises a dip tank.

89. The automatic stainer system according to claim [[86]] 100, wherein said fluid containment element comprises a heating member adapted to heat the at least one fluid.

New claim 99. An automatic stainer system for staining at least one tissue sample, comprising:

at least one slide having said at least one tissue sample disposed thereon;
at least one reagent;
at least one fluid containment element containing fluid for application to said at least one tissue sample during at least one pre-treatment operation performed on said at least one tissue sample prior to a staining operation;
a slide rack including said at least one slide having said at least one tissue sample disposed thereon, said slide rack further including a slide positioner element

adapted to rotate said at least one slide between a substantially vertical disposition for submerging said at least one slide into said fluid in said fluid containment element and a substantially horizontal disposition for application of said at least one reagent onto said at least one tissue sample;

a slide elevator for lowering said slide rack when said slide is substantially vertically disposed, and submerging said at least one slide into said fluid containment element, said slide remaining vertically disposed when submerged; and

a reagent application element adapted to apply said at least one reagent to said at least one tissue sample during a staining operation performed on said at least one tissue sample when said at least one slide is disposed substantially horizontally.

New claim 100. An automatic stainer system for staining at least one tissue sample, comprising:

at least one slide having said at least one tissue sample disposed thereon;
at least one reagent;

at least one fluid containment element containing fluid for application to said at least one tissue sample during at least one pre-treatment operation performed on said at least one tissue sample prior to a staining operation, wherein said at least one pre-treatment operation is chosen from the group consisting of target retrieval and deparaffinization;

a slide rack including said at least one slide having said at least one tissue sample disposed thereon, said slide rack further including a slide positioner element adapted to rotate said at least one slide between a substantially vertical disposition for submerging said at least one slide into said fluid in said fluid containment element and a

substantially horizontal disposition for application of said at least one reagent onto said at least one tissue sample;

a slide elevator for lowering said slide rack when said slide is substantially vertically disposed, and submerging said at least one slide into said fluid containment element, said slide remaining vertically disposed when submerged; and

a reagent application element adapted to apply said at least one reagent to said at least one tissue sample during a staining operation performed on said at least one tissue sample when said at least one slide is disposed substantially horizontally.

2. The following is an examiner's statement of reasons for allowance: the prior art does not fairly teach or suggest all of the elements of new claims 99 and 100 set forth above, in particular, the known prior art does not teach or suggest the slide rack including the at least one slide having the at least one tissue sample disposed thereon, the slide rack further including a slide positioner element adapted to rotate the at least one slide between a substantially vertical disposition for submerging the at least one slide into the fluid in the fluid containment element and a substantially horizontal disposition for application of the at least one reagent onto the at least one tissue sample and a slide elevator for lowering the slide rack when the slide is substantially vertically disposed, and submerging the at least one slide into the fluid containment element, the slide remaining vertically disposed when submerged.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to P. Kathryn Wright whose telephone number is (571)272-2374. The examiner can normally be reached on Monday thru Thursday, 9 AM to 6 PM, EST.
